- 2. The following is an examiner's statement of reasons for allowance:

The prior art of record fail to teach or fairly suggest with respect to claim 1, a method for operating an autonomous vehicle at an airport, comprising the steps of receiving (304; 404) constraint data representing a permitted area of operation; (f)-calculating (406; 310) a present position of the vehicle; (g)-comparing (312) the calculated present position of the vehicle with the constraint data, thereby to determine whether the vehicle's present position lies within the permitted area; with respect to

claim 14, an autonomous vehicle for use at an airport, comprising: electrical and mechanical subsystems (414) to enable the vehicle to move and to perform an allotted function; a constraint store for storing constraint data indicating a permitted area of operation; a comparator for comparing the constraint data with the present position; a first navigation receiver (400) for receiving a first set of navigation signals, being general purpose navigation signals; an operator interface (404) for communicating with an operator; and a second navigation receiver (402) for receiving a second set of navigation signals, being supplementary to the first navigation signals, for guiding aircraft to land at the airport in combination with the other elements and features of the claimed invention.
